

NOW AVAILABLE

AI Training Built for IT and Cybersecurity

ACI's new AI courses and labs are built for IT and cybersecurity practitioners. Get hands-on, applied upskilling for learners and teams that need to use AI as a tool and defend against it as a threat.

Courses and Labs

ALL STAFF

AI Essentials

Practical AI literacy for every professional on your team — how AI systems work, where they fail, and how to use them responsibly

-  **Seat time:** 19 hours
-  **Videos:** 16
-  **Labs:** 13 hands-on labs

SOC ANALYSTS & ENGINEERS

Prompting for AI in Cybersecurity Engineering

Covers structured prompting inside real security workflows — monitoring, investigation, threat intelligence, and responsible governance.

-  **Seat time:** 14 hours
-  **Videos:** 71
-  **Labs:** 6 hands-on labs

SECURITY TEAMS

CompTIA SecAI+

Prep for CompTIA SecAI+ (CY0-001) — the first standalone cert for AI security. Covers securing AI systems, defending against AI-driven threats, and governing AI risk.

-  **Seat time:** 21 hours
-  **Videos:** 45
-  **Labs:** 17 hands-on labs

Why ACI for AI

Aligned to the new CompTIA SecAI+ certification

ACI's course is built to CompTIA SecAI+ exam objectives — the credential security hiring managers and auditors are already asking about.

Comprehensive, end-to-end upskilling

AI courses live in myACI alongside existing Security+, CySA+, Cisco, and cloud paths — so you can upskill your team across all domains while ensuring they are using AI safely and responsibly.

Hands-on AI experience

Each course has aligned AI labs in real AI environments — it isn't just watching — it's hands-on training.

Measurable progress, not just access

Track engagement, completion, and skill progression across your team through myACI admin dashboards — so you can see results in real time.
